

### Solar cooker for cooking, barbecuing, roasting and deep-frying

The highly efficient solar cooker is available at any time of the year and within all degrees of latitude. You will be surprised at which short time dishes including cake, meet, stew, pizza, bread or pasta are ready to serve.

Our high-quality solar cooker is ideal for the garden, patio, balcony, or camping! Solar cooking is fun, it's easy on the environment, and most of all...it saves money!

Solar cooker **Premium14**  
Order-No.: 110-0007      359,00 EUR

Noble design, operatively sound and greatest possible control comfort.

The solar cooker is easily and quickly assembled and disassembled, and the swivel-type rack belonging to it allows to direct the cooker towards the sun.

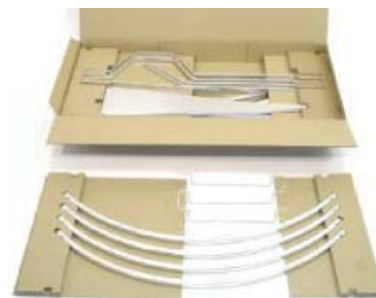

Due to a ceramic **protective layer** the reflecting material is weatherproof and sheltered from saline air as well as from pollution by chemicals.

The rack is made of zinc-plated steel and the rest is made of aluminium. The cooker kit is completely equipped thus integrating the comprehensive installation manual and cooking instructions.

Back view of the solar cooker. The reflector is protected from damage by a safety roll bar (see arrow)

**Technical Data:**  
Reflector diameter = 140 cm  
Output = 700 Watt at clear sky (1 litres of water are boiled within 9 minutes)  
Weight, packing included: 18,7 kg  
Packing dimensions: 117 x 55 x 10 cm

Due to its high-grade dual-usage packing, the solar cooker is well protected in transport.

Solar cooker **Premium11**  
Order-No.: 110-0003      289,00 EUR

Design and finish same as solar cooker **Premium14**, however with a reflector diameter of 110 cm.

In comparison to **Premium14** the complete solar cooker **Premium11** is made of aluminium.

The cooker kit is completely equipped thus integrating the comprehensive installation manual and cooking instructions as well as the fastening means.

**Technical Data:**  
Reflector diameter = 110 cm  
Output = 450 Watt at clear sky (1 litres of water are boiled within 13 minutes)  
Weight, packing included: 11,5 kg

**(Camping-)Solar cooker CookAway16**  
 Order-No.: 110-0002      **239,00 EUR**

Solar cooker and parasol in one - assembled and modified into a parasol within a minute.

Transport Box  
 Weight 4,5 kg

**Technical Data:**

- Reflector diameter = 1,6 m
- Output = 500 Watt at clear sky (1 litres of water are boiled within 12 minutes)
- Weight, transport box included = 4,5 kg
- Packing dimensions= 11,5 x 16 x 104 cm
- Assembly time = only 1 minute
- Due to its light weight please do not use the CookAway16 on a windy day!

**CookAway16**  
**Solar Cooker**  
**To Go**

The CookAway16 is suitable for smoke-free cooking, grilling and baking.

It can easily be transported and stowed away due to its light weight of only around 4.5 kg and its small packaging size (11,5 x 16,0 x 104 cm).

**It is an absolute MUST for the outdoor fan and ideal for camping and long journeys!**

The solar cooker CookAway16 has a reflector/ umbrella diameter of 1.6 m and a net performance value of about 500 W for cooked foods. Hence, it is a little more efficient than our Premium11.

It consists of a stable, folding steel tripod and a umbrella made of polyester stuck attached to a reflector foil.

The CookAway16 can be modified into a parasol with just grip handles and without use of any tools.

The CookAway16 will be delivered in a robust and reusable transport box made of plastic.

Scope of delivery: Reflector/ umbrella, tripod, pot holder, hinges, parasol stick, transport box, pegs to protect the solar cooker against overturning on a windy day and a detailed installation manual.

**TERMS OF DELIVERY**

All prices including 19 % VAT. Freight and packing are extra costs.

Our general terms of payment and delivery are effective. All previous price lists become invalid by this price list.

**Preferably, the pot or other cookware should be painted matt black.**

You will find recommendations for further cooking utensils appropriate for the solar cooker at our internet website.
